Advantage®
Where Connectivity Meets Innovation

Managed Services

Providing continuous support for move, add, change, and disconnect requests.
"Advantage has been really great when we have to bring up new sites, shut them down or move them. The whole life cycle process with them is phenomenal."

— Victor Perez, Director of Infrastructure at SCO Family of Services

Advantage® is here to handle all moves, adds, changes, and disconnects (MACDs) on behalf of our valued partners to address their most pressing connectivity needs. We proudly provide comprehensive support from initial task submission through final inventory management to reduce strain on internal teams.

Move:
A physical move or transfer of service to a new location.

Add:
Inclusion of a service or product that does not currently exist.

Change:
Modifying existing services, such as an upgrade or downgrade.

Disconnect:
Deactivating a service that has been installed and is actively billed.

Whether we're assisting with one site or thousands, our team delivers dependable timelines and escalation management. We also ensure each partner has access to our Command Center^{SM} platform, where they can easily monitor all inventory records.

Take Advantage

Leverage our team to manage your MACD activities with expert efficiency from start to finish
